Summary

Data Analyst with 8+ years spanning data engineering, experimentation/attribution modeling, and BI reporting for both technical and non-technical stakeholders. Comfortable moving between building pipelines/data models and designing the experiments and dashboards that shape stakeholder decisions.

Experience

Senior Data Analyst, Data Engineering

Apr 2021 - Present

Universal Music Group

- Built and maintained pipelines processing financial, logistics, chart reporting, and customer service data at scale, powering reporting and decision-making for Analytics teams
- Partnered directly with business stakeholders to design executive and client-facing dashboards, translating raw data into insights that shaped ecommerce strategy
- Re-architected SQL data models by migrating to Dataform, reducing query runtimes and eliminating recurring pipeline failures that previously required manual reruns
- Mentored and trained offshore data engineering team on data analysis standards and ad hoc request handling, reducing onshore intervention needed and freeing senior analysts to focus on strategic work

Data Analyst

Oct 2017 - Mar 2021

Labelium (Digital Marketing Agency)

- Designed and led geo-based experiments (holdout/test market design) to isolate the causal, incremental lift of Search Ads spend
- Built and productionized multi-touch attribution model for non-branded search, exposing under-credited channels that last-touch attribution models missed; presented methodology to clients and successfully defended continued investment in generic search term campaigns
- Automated weekly client reports, saving account managers up to 2 hours per report

Artist Management & Marketing

2016 - 2021

Independent hip-hop artist, Jordan W. Carter

- Led release rollout coordination (artist, videographers, DSP distribution) and marketing strategy (paid media, influencer outreach), translating campaign data into decisions for a non-technical creative team

Skills

- Python, SQL, R · Dataform/dbt, BigQuery, GCP · A/B testing, geo-experiments, attribution modeling, funnel analysis · Google Analytics/GTM, Airflow, Meta Business Manager · Domo, Looker

Education

Boston University, B.A. in Statistics

May 2017
