Summary

Data Analyst with 8+ years spanning data engineering, experimentation/attribution modeling, and BI reporting for both technical and non-technical stakeholders. Comfortable moving between building pipelines/data models and designing the experiments and dashboards that shape stakeholder decisions.

Experience

Senior Data Analyst, Data Engineering

Apr 2021 - Present

Universal Music Group

- Built and maintained pipelines processing ecommerce (Shopify), logistics, financial, and customer service data at scale, powering reporting and decision-making for Analytics teams
- Reconciled ecommerce financial reporting against source systems by establishing unique transaction keys and auditing report accuracy, closing gaps used for Finance-facing deliverables
- Partnered directly with business stakeholders to design executive and client-facing dashboards, translating raw ecommerce and operational data into insights that informed strategy
- Applied hands-on GA4 experience to support event-based tracking initiatives within the broader analytics function

Data Analyst

Oct 2017 - Mar 2021

Labelium (Digital Marketing Agency)

- Designed and led geo-based experiments (holdout/test market design) to isolate the causal, incremental lift of Search Ads spend
- Built and productionized multi-touch attribution model for non-branded search, exposing under-credited channels that last-touch attribution models missed; presented methodology to clients and successfully defended continued investment in generic search term campaigns
- Analyzed purchase funnels (GA/GTM) to identify drop-off points in the customer journey
- Automated weekly client reports, saving account managers up to 2 hours per report

Skills

- *Languages*: Python, SQL, R
- *Data Modeling & Warehousing*: Dataform (dbt-equivalent), BigQuery, GCP
- *Experimentation & Analytics*: A/B testing, geo-experiments, multi-touch attribution, funnel analysis
- *Marketing/Product Tooling*: Google Analytics, Google Tag Manager, Airflow, Meta Business Manager
- *Visualization & Reporting*: Looker, Domo

Education

Boston University, B.A. in Statistics

May 2017
